DETAILS

The first year postpartum is a unique window in terms of UI, POP and sexual dysfunction, due to factors such as birth induced pudendal neuropathy, birth induced PFM trauma, and the impact of genitourinary syndrome of lactation. This session will therefore review the latest evidence on the management of UI, POP & sexual dysfunction specifically in the first year post-partum.

WHTA Research Update 2027

PELVIC FLOOR during PREGNANCY and the 1st YEAR POSTPARTUM

DETAILS - SESSION 4

Impact of Exercise on the Pelvic Floor in Pregnancy and Early Postpartum

OPTION 1 - SYDNEY, AUS TIME	OPTION 2 - SYDNEY, AUS TIME

London, UK	Saturday 9 Oct 10pm - 2am	**London, UK**	Sunday 17 Oct 8am - 12pm

DETAILS

Historically, pelvic health clinicians often discouraged early return to exercise and sport after birth, for fear of placing excessive strain on healing pelvic floor tissues and ultimately causing UI and prolapse. But was this fear really justified? This session will provide participants with a review of the latest research on the benefits vs risks of early return to sport / exercise soon after birth, with consideration to the unique and differing circumstances of different women.
